Class Size 2002-03

Introduction

Chapter 256D established the Iowa Early Intervention Block Grant Program. The program was initially established through House File 743 in 1999 to fund class size reduction for Iowa public schools for early elementary grades. The program's goal was the reduction of average class size in basic skills instruction for kindergarten through third grade to 17 students per teacher. In addition, the program's goals were to provide direction and resources for early intervention efforts by school districts to achieve a higher level of student success in the basic skills, especially reading skills, and increase communication and accountability regarding student performance. Program funding for each of the last four years is as follows:

- \$10 million in FY 2000
- \$20 million in FY 2001
- \$30 million in FY 2002
- \$30 million in FY 2003

House File 759 as enacted in the 2001 Second Extraordinary Session (November 2001) provided that districts could use funds received for the Iowa Early Intervention Block Grant Program for any general fund purpose. The expanded use of these funds was limited to the 2001-02 year. Approximately one million dollars were moved from the class size reduction funds to general fund purposes. Thirty-three districts made such adjustments to their expenditures.

Districts also have been able to reduce class size through the receipt of federal funds. Iowa districts received from the U.S. Department of Education through the Class Size Reduction Program the following amounts:

- \$9.4 million in FY 2000
- \$10.2 million in FY 2001
- \$12.8 million in FY 2002
- \$12.8 million in FY 2003

Methodology

Iowa public school districts report class size data on the Iowa Department of Education's Basic Educational Data Survey (BEDS) each fall. The BEDS Class Size report collects data for kindergarten, first, second, and third grade classrooms for all Iowa public school districts. Districts also report data for nontraditional classrooms, and classrooms which combine students from different grades, for example K-5 classrooms. For each homeroom classroom, districts reported the number of students, teachers and aides. Special education, Title 1 and other pull-out classrooms were excluded. Special education, art, music, physical education and other specialty teachers were excluded from the total number of teachers.

Average class size was calculated by dividing the number of students by the number of classrooms for each grade level kindergarten through third grade. Students in combination classrooms were excluded from average class size calculations. For example, students in a second-third grade combination classroom were not included in the average class size for a second or third grade.

Limitations

According to HF 743, funds received under the Iowa Early Intervention Block Grant Program could be used to:

- hire additional licensed instructional staff;
- provide additional support for students, including before and after school programs, tutoring, and intensive summer programs;
- acquire and administer diagnostic reading assessments;
- implement research-based instructional intervention programs for students needing additional support;
- implement all-day, everyday kindergarten programs; and
- provide classroom teachers with intensive training programs to improve reading instruction and professional development in best practices, including, but not limited to, training programs related to instruction to increase students' phonemic awareness, reading abilities and comprehension skills.

The data provided in this report is a one-time snapshot of the classroom. Additional teachers and aides hired, or classroom sections added during the second semester were not included in the report.

Findings

A comparison of average class size by grade for the past five school years is provided in Table 1 and Figure 1. Average class size increased slightly from 2001-2002 to 2002-2003 for kindergarten through second grade and remained the same for third grade. This was the first increase in the five years under review. Grades one and two increased to their 2000-2001 average. All grades remain below their 1998-1999 level.

Table 1

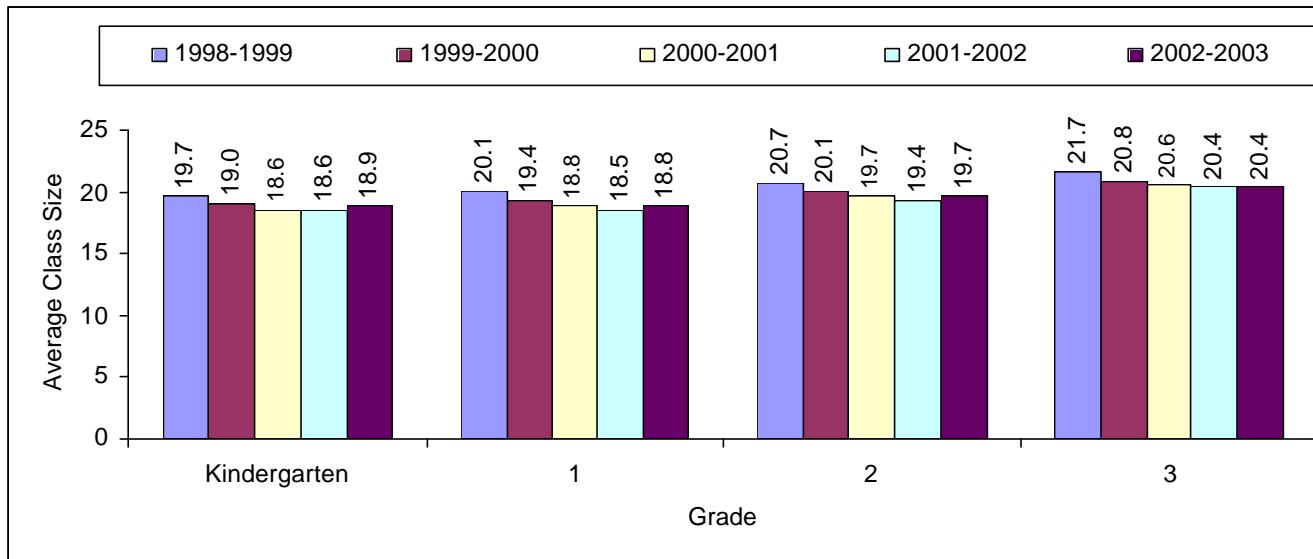

**IOWA PUBLIC SCHOOL DISTRICT
AVERAGE CLASS SIZES FOR GRADES K – 3
1998-1999 TO 2002-2003**

Grade	1998-1999	1999-2000	2000-2001	2001-2002	2002-2003

The variation in change to average class size is more apparent when examined by enrollment category. Tables 2-6 show average class size by enrollment category. The smallest enrollment category, less than 250 students, had the smallest average class size in 2002-2003 for all grade levels reviewed, continuing the trend seen in 1998-1999. Although average class size increased for some enrollment categories and grade levels from 2001-2002 to 2002-2003, the 2002-2003 averages remained below their 1998-1999 levels. As in past years, average class size tended to increase as enrollment increased in 2002-2003. For example, average class size for kindergarten in the 7500+ enrollment category (20.3) was 78.1 percent greater than the average class size for kindergarten in the under 250 category (11.4). The difference from largest to smallest enrollment category was 82.9 percent for first grade, 82.1 percent for second grade, and 65.7 percent for third grade.

Although the percentage of classrooms above 17 students increased from 2001-2002 to 2002-2003 the percentage of very large classrooms, those with 30 or more pupils, did not increase by the same rate (see Table 7). For example, the percentage of kindergarten classrooms with more than 17 students grew by 7.6% from 2001-2002 to 2002-2003 but the percentage of kindergarten classrooms with more than 25 pupils declined during the same period. The percent of classrooms over 17, 21, 25 and 30 students declined from the 1998-1999 base year to 2002-2003.

The percentage change in BEDS enrollment for kindergarten through third grade was greater than the percentage change in average class size for each grade level (see Tables 8 and 9). For example, second grade BEDS enrollment declined by 8.6 percent from 1998-1999 to 2002-2003 but average class size declined by 4.8 percent during the same period.

Expenditures

Over 97 percent of the funds expended in 2001-02 on the Iowa Early Intervention Block Grant Program was expended on staff salaries and benefits. A relatively small amount of funds were expended on supplies, \$583,351. A statewide summary breakdown of the expenditures is presented in Table 10 and Figure 2.
